

### **Listing of Claims**

1. (Currently Amended) An isolated antibody that recognizes a tumor necrosis factor-related apoptosis-inducing ligand receptor 2 (TRAIL-R2~~receptor~~) wherein the antibody consists of at least one linker and at least three Fv units, wherein said Fv units bind to ~~the~~ TRAIL-R2 ~~receptor, and wherein the TRAIL receptor has a cytoplasmic death domain.~~

2. – 4. (Canceled)

5. (Previously Presented) The antibody of claim 1, wherein said antibody comprises three scFv, and said scFv units form a trimer.

6. (Original) The antibody of claim 5, wherein two of the variable regions in the scFv units are linked together *via* a linker with zero to two amino acids.

7. (Original) The antibody of claim 6, wherein the linker comprises zero amino acids.

8. (Original) The antibody of claim 6, wherein the linker comprises one amino acid.

9. (Canceled)

10. (Previously Presented) The antibody of claim 1, wherein said antibody comprises two sc(Fv)<sub>2</sub> molecules, and wherein said sc(Fv)<sub>2</sub> molecules form a dimer.

11. (cancelled)

12. (Currently Amended) The antibody of claim 1, which induces apoptosis in a cell expressing ~~the~~ TRAIL-R2~~receptor~~.

13. (Original) The antibody of claim 12, wherein the cell is a tumor cell.

14. (Currently Amended) The antibody of claim 1, wherein said antibody comprises a trimeric or higher multimer of the amino acid sequence of SEQ ID NO: 2, 4, 6, or 8.

15. – 26. (Canceled)

27. (New) The antibody of claim 1, wherein said antibody comprises a dimeric or higher multimer of the amino acid sequence of SEQ ID NO: 8.
